Forecast for Tuesday 27 Dec 2022

Weather: The day will start off dry but cloud and snow will spread north by the end of the morning. Then outbreaks of snow for a time this afternoon before drier weather develops from mid-afternoon onwards. The rest of the day will see wintry showers, but any snow confined to the higher tops as the freezing level rises.

Chance of cloud-free hill tops above 800m: Best chance first thing with only small amounts of cloud on the tops, then decreasing 20% in the afternoon with ranges north of Cairngorm fairing best

Low cloud and visibility: Becoming poor in snow and extensive hill fog down to 700 metres from late morning. Some breaks in the cloud sheet developing from mid-afternoon onwards.

Met Office Aberdeen Meteorologist's View
Strong winds leading to blowing snow on the tops and severe wind chill. Note rising freezing level later in the day.

Forecast for Wednesday 28 Dec 2022
Weather: A few snow showers overnight, otherwise dry in the morning. Thickening cloud will bring rain and snow north during the afternoon and evening, although some uncertainty into the timing of this.

Maximum wind: Southeasterly 25 mph

Chance of cloud-free hill tops above 800m: Best chance in the morning, but cloud will lower onto the summits from the south as the afternoon progresses

Low cloud and visibility: Good visibility in the morning with only small amounts of cloud on the tops. Cloud down to 700 metres will spread north in the afternoon, becoming widespread by evening.

Temperature: **Glens:** Minus 1 rising to 4 Celsius
At 800m: 0 Celsius
Freezing level: 800 to 1000 metres
